

Identify parts before assembling.

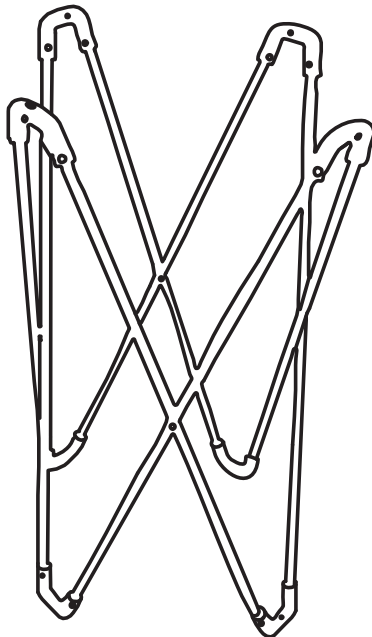

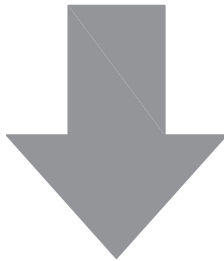

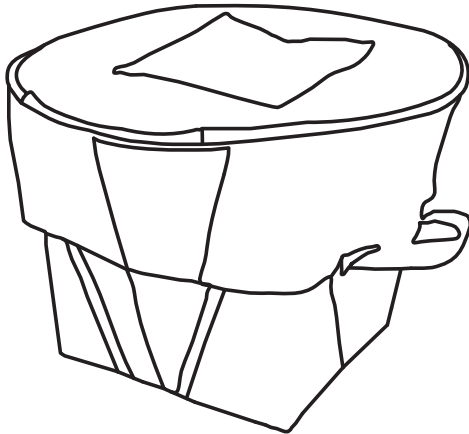

**A x 1**  
Collapsible Cooler Bag

**B x 1**  
Collapsible Stand

1

**Step 1:** Shape the cooler (1). The soft side cooler comes compressed. Reshape it by gently pulling the ends and sides. It should be fully extended and upright when you are finished.

**Step 2:** Open the stand (2). Position the stand with four legs up. Gently pull opposite corners of the same end to unfold the stand.

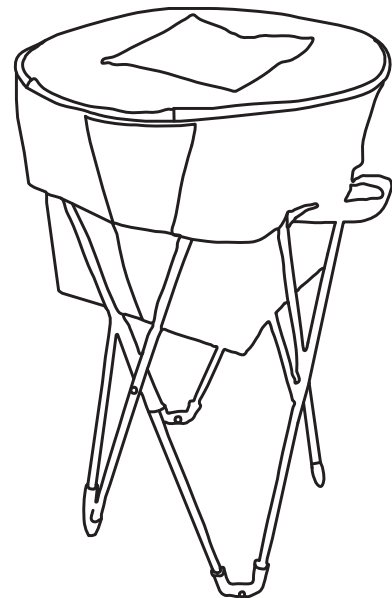

**Step 3:** Place the cooler (2) on the open stand (2). The cooler has inverted pockets on both sides of its handles. Fit the pockets over the rounded ends of the stand. You may need to open or close the stand a bit for the cooler to fit.

**Step 4:** Secure. Make sure the stand is securely in the pockets of the cooler.

**NOTE:** Lifting the cooler by the handles will not lift the entire cooler and stand. The handles are meant for lifting the cooler bag only. Holds up to 48 12oz. cans.

#### Care and Maintenance

1. We recommend filling the cooler after it has been set up. It can be filled prior, but it is easier to assemble when the cooler bag is empty.
2. To extend the life of your cooler, don't over fill it or drag it.
3. Clean the cooler and stand by wiping them down with a damp rag. Mild detergent may be used when needed. Do not wash in the washing machine.
