Assembly

1. Attach shelf to side frames with 4 medium screws.

2. Attach basket to side frames with 4 medium screws (32 mm). Secure screws from underside with a hex nut, flat side up.

3. Insert flat black cap into bottom of lower tube (end with 1 hole). Attach lower tube (capped end down, 2 top holes facing outward) to the center of one side frame, black spacer between the pole and frame, with a long screw (58mm). Secure screw with hex nut.

4. Insert the middle pole into the lower pole. Attach to basket with L-bracket, so the curved end of the bracket lays against the underside of the basket. Attach to basket with brace screw (23 mm), and secure with hex nut; secure L-bracket to poles with 2 short screws (12 mm).

5. Cap hanging bar with silver ball cap. Attach hanging bar to hook tube, with silver spacers at each connection, with 2 thick long screws (45 mm). **NOTE:** Beginning with connection to the straight part of the hooked tube, alternate tightening straight and hook connection until both are fully tightened.

6. Attach hooked tube to middle tube with 2 short screws (12 mm). Tighten all screws and nuts.
